7. Functional and Performance Testing

7.1 Vulnerability Report (Vulnerability Assessment and Impact):

1. Introduction to Vulnerability Assessment:

Vulnerability assessment is a critical security process used to identify, evaluate, and prioritize security weaknesses in an organization's IT infrastructure. This assessment helps in mitigating risks before cybercriminals exploit them.

Assessment Type: Network Security, Web Application Security, Compliance Audit

2. Impact Analysis:

- Business Impact: Data breaches, financial losses, reputational damage.
- **Technical Impact:** System downtime, unauthorized data access, malware infections.
- Compliance Risk: Non-compliance with security standards like ISO
 27001, PCI-DSS, GDPR.
